

Lecture 9 : What are Variables & its Type (Hypothesis Testing)

Variable is a property that can take on many values

Eg age =
12
13
40
100

height = 172 weight
137
180

Variable = Singular Nucleus

Age = [12, 24, 48, 100]

Variable Type

↓
Quantitative Variable

Discrete

No children

Whole no
data

Continuous

eg height

172.5

180.5

Qualitative Variable

Categorical

Gender

Male

Female
